Mr. Jeff Bertelson, VP Operation, ESIC

Once again ESIC amazed me with the timely design and construction management on the employee commons area project. The readiness and creative thinking on the temporary facilities for our employees during the remodel made the project exciting. Although the schedule was very aggressive you and your team performed the necessary tasks to complete on time.

The ESIC group as a whole was a pleasure to work with. At any given time, arising questions were answered in a timely manner. The design team's layout met all the needs and expectation that we had for the employee commons area.

I can't say enough about the performance of the construction management team, from the project manager to the construction manager onsite, every issue down to the smallest was addressed and there were not any deviations from the original plans. However, I do want to make a few comments about the construction manager that was assigned to the project onsite. His performance was outstanding. The relationship that was built between him and the management team at Land O' Frost was worth mentioning. He worked hard to accommodate everyone's needs and request. He kept everyone posted on events and schedules.

Over the last 29 years that I have been employed at Land O' Frost, ESIC has been the top Design/Build Company that I have been associated with that understands what it is to work in the food processing facility while in production.

Great job to you and your staff

Michael Wammack

Facilities Maintenance Manager
