Brad Barke
ESI Constructors
950 Walnut Drive
Hartland, WI 53029

Dear Brad

I would like to take a moment to formally acknowledge your organization and its efforts on two projects at our Sargento Foods, Plymouth, WI facility. Of course, I am referring to the successful completion of our 2005-'06 Distribution Center addition and the current 2007 Bulk Cooler and Dock project.

From a design standpoint, ESI Design Services brings well-rounded experience and solid engineering to our food warehouse projects. Although we maintain high building design and construction standards at Sargento, we have been able to further our standards by learning from your nationwide food plant experience. This has served both to improve the design of our warehouses as well as to make them more cost effective to build and operate.

Relative to Construction Management, your bid qualification process has saved us many hours of bid evaluation time by providing clear and in-depth bid analysis - per CSI section. Further, Mark Gehl has raised the bar for construction at Sargento. His meetings are efficient, disciplined and well organized. More importantly, the emphasis he places on safe work practices and jobsite coordination result in a clean, safe and smooth running construction site.

All of us at Sargento look forward to the successful completion of the current project and to future projects with ESI.

Cordially,

Sargento Foods
